This is “Molly”. Molly is a lovely Quarter Horse Mare who’s in her early 20’s. Molly has been rescued twice in the last year. She came to us quite underweight and with a severe uterine infection called Pyometra. The infection was caused from being underweight. She was treated for the infection and had a minor surgery. We had concerns of the infection being chronic but she has no signs of any infection. She is sooo sweet. She does have a bit of arthritis in her hocks but the vet said she’s sound as a leadline horse for walking and trotting. She is available for adoption as a pasture companion or light duty kids horse. Her adoption fee is \$500.

He was so thin and beat up when he came to the rescue. He has come a long way. He came to us not wanting human companionship. He is now the first horse to the gate to visit. He can be a bit herd bound. He falls in love with the mares. Sarge would be suitable for an intermediate or advanced rider. Email or call for more info on Sarge.

This is "Lance". Lance was abandoned with the same group as CoCo. He is only 2y/o. He also suffered from severe malnutrition, which we believe stunted or slowed his growth. He is intact and in need of gelding. Lance we believe may have suffered some brain damage as a result of being starved. He has pneumonia and suffering from anemia as well. He is currently on antibiotics and Iron supplements. We are hoping for a full recovery. If Lance has suffered permanent brain damage, he will remain safe as a permanent resident here at ReHorse. We will continue to update as to his progress. Please sponsor Lance he's a very special boy.
